Chief Complaint

Patient presents with

- Ingestion

History limited by:[AM.1] Age[AM.2]

History of Present Illness^[AM.1]

20m old male with a PMH of autism here for accidental ingestion

Got ahold of the mother's abilify 5mg tablet

Uncertain how many tabs were in the bottle, mom found him with a half dissolved tablet in his hand

Occurred just prior to arrival

Immediately called IPC and was referred to the ER

ED Provider Notes (continued)**ED Provider Notes by Meriweather, Alexis D, MD (continued)**

7/18/2026 8:00 PM

Acting normal, is a little fussy but did not have a nap today
No vomiting^[AM.2]

No past medical history on file.

History reviewed. No pertinent surgical history.

There are no discharge medications for this patient.

Family History**Family History**

Problem	Relation	Name	Age of Onset
• Other (nutcracker disease)	Maternal grandmother		
<i>Copied from mother's family history at birth</i>			
• Thyroid Disease	Maternal grandmother		
<i>Copied from mother's family history at birth</i>			
• Mental Illness	Natural mother	Herrell, Shawna M

ED Provider Notes (continued)**ED Provider Notes by Meriweather, Alexis D, MD (continued)**

7/18/2026 8:00 PM

General: crying
Respiratory: no respiratory distress, CTAB
CV: normal peripheral perfusion, regular rate and rhythm
GI: abdomen non-distended, soft, non-tender
GU: normal appearing genitalia for age and gender
Extremities: no deformity, no swelling
Skin: warm, dry, no pallor
Neuro: alert, moves all extremities appropriately
Eyes: no discharge, no erythema, PERRL, EOMI
ENT: moist mucus membranes, oropharynx clear,^[AM.2]

Procedures**Data****The following medicines were administered/ordering during the patient's ED stay:**

Medications - No data to display

I have personally ordered each of the following tests and reviewed the results.

Labs Reviewed - No data to display

I have personally ordered each of the following imaging studies and reviewed the results.

No orders to display

I have independently interpreted the following imaging studies:^[AM.1]None^[AM.2]**Review of Data from Other Source^[AM.1]**None^[AM.2]**External sources reviewed for:****Was the use of an independent historian required?^[AM.1] Yes (mom)^[AM.2]****Social Determinants of Health Affecting Case^[AM.1]**Vulnerable patient due to age (dependent child or elder)^[AM.2]

Critical Care time:^[AM.1] Yes, I spent 34 minutes in direct care of this patient, independent of other billable procedures and the care of other patients. Critical care time was needed for the treatment/prevention of Toxidrome. This time was spent obtaining the initial history and exam, ordering of tests and/or radiologic studies, reviewing of testing results, re-evaluating the patient's condition and response to treatment, discussing with consultants, and documenting in the medical record.^[AM.2]

ED Course as of 07/19/26 1953**Sat Jul 18, 2026**

1720 IPC recommends: 6-8 hours obs
