RADIOLOGY REPORT

=====

EXAM:
CT HEAD WO CONTRAST

HISTORY:
ReasonForStudy: Altered Mental Status; syncope, small laceration to rt temple area

COMPARISON:
None available

TECHNIQUE:
CT of the head without contrast

FINDINGS:
No hemorrhage or extra-axial collection. No midline shift or mass effect. The mastoid air cells are clear. No sinus air-fluid levels. No skull fracture or suspicious bony lesion.

IMPRESSION:
No acute intracranial process.
All CT scans at this facility use dose modulation, iterative reconstruction, and/or weight based dosing when appropriate to reduce radiation dose to as low as reasonably achievable.

PROGRESS AND PROCEDURES

Course of Care: Patient is stable.

15:20. PT HAS BEEN UP WALKING NDER OWN POWER, TOLERATING PO AND STILL HAS NO COMPLAINTS OF PAIN OR DISCOMFORT. LABS/ CT WNL. WILL D/C TO PRISON FOR CLOSE OBSERVATION AND F/U.

Critical care performed (60 minutes). Time includes: direct patient care, patient reassessment, coordination of patient care, interpretation of data (laboratory data) and documentation of patient care- see progress notes.

Differential Diagnosis:
I considered vasovagal reflex, situational stimulus, micturition, cough, sneezing, swallowing, post-prandial state, cardiac sinus hypersensitivity, sudden postural change, prolonged standing, hypovolemia, adrenal insufficiency, arrhythmia, seizure, hypoxia and hypoglycemia as a possible cause of syncope in this patient.
Above considerations are based on history, physical exam, reassessment and laboratory data.
Differential diagnosis was discussed with patient.

Disposition: Condition: good. Discharge decision based on the following: patient's condition is stable; patient's exam is stable; no seriously abnormal test results; stable condition on multiple repeat evaluations; social support is adequate; transportation is available; follow-up is available; clinical impression is consistent with outpatient treatment.

CLINICAL IMPRESSION

Common syncope.

DISCHARGE INSTRUCTIONS

No strenuous activity. Rest.
Drink plenty of fluids.

Warnings: GENERAL WARNINGS: Return or contact your physician immediately if your condition worsens or changes unexpectedly, if not improving as expected, or if other problems arise.

Follow-up:
Follow up with your healthcare provider tomorrow even if well. Call for an appointment.

Understanding of the discharge instructions verbalized by patient.
