

Physician Clinical Narrative

Bleckley Memorial Hospital

145 E Peacock St. Cochran, GA 31014 4789346211

08/09/2026 01:11:00

Patient: MARKL, CHRISTIAN MRN#: 003787 Acct#: 559045 Sex: Male DOB: 12/18/2001 Age: 24y

Measurements

Wt: 170.1 kg

Initial Vital Sign

Measured Time	BP	MAP	HR	RR	O ₂ Sat	ETCO ₂	Temp	Pain	GCS	RTS
01:17 08/09/2026	145/87	106	105	22	97% RA		98.7 F	10	15	

Time Seen: 01:13 08/09/2026.
Arrived- By private vehicle. Historian- patient. Independent historian- family.

HISTORY OF PRESENT ILLNESS

Chief Complaint: CHEST PAIN RIGHT SIDE/ RIGHT RIB PAIN. This started 4 hours ago; 24 YO MALE FELL OFF ATV WITH PAIN RIGHT SIDE/ RIGHT RIBS. NO SOB. NO HEAD INJURY. NO NECK PAIN. NO WEAKNESS, NUMBNESS CHANGE IN SPEECH, GAIT OR VISION and is still present. At its maximum, severity described as moderate. When seen in the E.D., severity described as moderate. Modifying factors- worsened by movement. Relieved by rest. Not relieved by anything. No loss of appetite, weight loss, headache or fatigue. The patient has had muscle aches.

Similar symptoms previously. None.

Recent medical care: Not recently seen/assessed.

REVIEW OF SYSTEMS

All other systems reviewed and are negative.

PAST HISTORY

See nurses notes.
GERD
STOMACH ULCER

Surgeries:
Tonsillectomy

Medications:
no known home medications

Allergies:
Augmentin

SOCIAL HISTORY

Never smoker. No alcohol use or drug use.

FAMILY HISTORY

Negative.

ADDITIONAL NOTES

The nursing notes have been reviewed.

PHYSICAL EXAM

Appearance: Alert. (MO).
Neck: Normal inspection. Neck supple.
CVS: Normal heart rate. Heart sounds normal. Pulses normal. (PAIN TO PALPATION RIGHT LATERAL RIBS. NO CREPITIS/ NO STEP OFF).
Respiratory: No respiratory distress. Painless inspiration. Breath sounds normal.
Abdomen: No visible injury. Soft and nontender. Bowel sounds normal. No organomegaly. No mass. Femoral pulses equal.
Back: Normal inspection.
Skin: Skin warm and dry. Normal skin color. No rash. Normal skin turgor.
Extremities: Extremities exhibit normal ROM. No lower extremity edema.
Neuro: Oriented X 3. No motor deficit. No sensory deficit. Reflexes normal.

=====

RADIOLOGY REPORT

=====

EXAM:
CT CHEST, ABDOMEN, AND PELVIS WITH CONTRAST
HISTORY:
REASON FOR CHEST: TRAUMA; TRAUMA; CHEST PAIN, ABD PAIN, RT SIDE RIB PAIN;
4-WHEELER MVA
COMPARISON:
None.
TECHNIQUE:
Axial images were acquired of the chest, abdomen, and pelvis with IV contrast.
Sagittal and coronal reformatted images were provided. All images were reviewed
in a variety of windows and levels. 3D MIPS were performed and reviewed.
RADIATION REDUCTION TECHNIQUE: Automated exposure control, Adjustment of the mA
and/or kV according to patient size, or iterative reconstruction techniques
were used. 3D MIPS were performed and reviewed.
FINDINGS:
CHEST:
THYROID GLAND: The thyroid gland is unremarkable.
HEART AND VESSELS: The heart size is within normal limits. There is no evidence
of a pericardial effusion. The thoracic aorta is normal in size without
evidence of aneurysm or dissection. The main pulmonary artery size is within
normal limits. There are no gross filling defects seen in the visualized
portions of the pulmonary arteries to suggest a pulmonary embolism.
LYMPHNODES: There is no evidence of axillary, hilar, or mediastinal
lymphadenopathy.
AIRWAY: The trachea and mainstem bronchi are patent. There are no intraluminal
lesions seen.
LUNGS: The lungs are clear. There is no focal consolidation, pleural effusion,

or pneumothorax.
ESOPHAGUS: The esophagus is grossly unremarkable.
BONES: The visualized bones demonstrate degenerative change. There are no concerning lytic or blastic lesions identified.
ABDOMEN AND PELVIS:
LIVER: Mild hepatic steatosis. There is no evidence of intrahepatic or extra hepatic duct dilation.
GALLBLADDER: The gallbladder is unremarkable.
SPLEEN: Spleen is enlarged measuring 18.5 cm in length.
PANCREAS: The pancreas enhances homogenously and is unremarkable.
ADRENAL GLANDS: The adrenal glands enhance homogenously and are unremarkable.
GU: The kidneys enhance homogenously and symmetrically. Their collecting system is of normal caliber.
URINARY BLADDER: The urinary bladder is unremarkable.
VESSELS: The abdominal aorta is normal in size without evidence of aneurysm or dissection. The celiac artery, superior mesenteric artery, renal arteries, and inferior mesenteric artery are patent.
GI: The stomach and small bowel is unremarkable. There are no inflammatory changes seen in the right lower quadrant to suggest secondary signs of acute appendicitis. Normal appendix right lower quadrant.
LYMPHNODES: There is no evidence of retroperitoneal or mesenteric lymphadenopathy. Scattered lymph nodes that are seen in the retroperitoneum and mesentery do not meet CT criteria for lymphadenopathy.
BONES: The visualized bones are intact. There are no concerning lytic or blastic lesions identified.
IMPRESSION:
Splenomegaly.
Mild hepatic steatosis.
No evidence of acute traumatic injury to the chest abdomen or pelvis.
THIS IS AN ELECTRONICALLY VERIFIED FINAL REPORT

PROGRESS AND PROCEDURES

Course of Care: Patient is stable.

Critical care performed (60 minutes). Time includes: direct patient care, patient reassessment, coordination of patient care, review of patient's medical records, medical consultation and documentation of patient care.

Differential Diagnosis:

I considered chest wall pain, muscle strain, costochondritis, pleurisy, rib fracture, intercostal neuritis, pulmonary embolism, pneumonia, pneumothorax and gastroesophageal reflux disease as a possible cause of chest pain in this patient.
Above considerations are based on history, physical exam and past history.

Disposition: Condition: good. Discharged in good condition. Discharge decision based on the following: patient's condition is stable; patient is ambulatory; patient drinking fluids; patient's pain is controlled; patient's exam is stable; no abnormal test results; stable condition on multiple repeat evaluations; social support is adequate; transportation is available; follow-up is available.

CLINICAL IMPRESSION

Contusion to the right chest.

DISCHARGE INSTRUCTIONS

Warnings: GENERAL WARNINGS: Return or contact your physician immediately if your condition worsens or changes unexpectedly, if not improving as expected, or if other problems arise.

Prescription Medications:

RX KETOROLAC/ FLEXERIL.

Follow-up:

Follow up with your healthcare provider in two days if not better. Call for an appointment.

Understanding of the discharge instructions verbalized by patient and parent.

Tonsillectomy -- 01:24 08/9/26 EDT Brian Moore, L.P.N.

History

01:17 08/09/26.

PAST MEDICAL HX: Immunizations: Tetanus status: unknown. Other immunizations: status is unknown.

LNMP: (NA).

Denies current pregnancy.

SOCIAL HX: Regular vaping. Occasional alcohol use. Drug use. (DENIES). The patient has not traveled outside the U.S.

Infectious disease exposure: No infectious disease exposure.

ABUSE ASSESSMENT: Abuse denied. No suspicion of abuse.

SELF HARM ASSESSMENT: Self harm assessment was performed. The patient answered "no" to the question(s) "Have you recently felt down, depressed, or hopeless?", "Do you have thoughts of harming or killing yourself?", "Do you have a plan for harming or killing yourself?", "Have you recently had thoughts about harming or killing others?", "Do you have any dangerous items in your possession?", "Have you noticed less interest or pleasure in doing things?", "Are you here because you tried to hurt yourself?" and "Have you ever tried to hurt yourself before today?".

NUTRITIONAL RISK ASSESSMENT: The nutritional risk assessment revealed no deficiencies.

FUNCTIONAL ASSESSMENT: Functional assessment: no impairments noted.

LEARNING NEEDS ASSESSMENT: The learning needs assessment revealed no barriers.

FALL RISK ASSESSMENT: Fall risk assessment completed. No risk factors identified.

SKIN INTEGRITY ASSESSMENT: Skin integrity risk assessment completed. No skin integrity risk identified. -- 01:27 08/9/26 EDT Brian Moore, L.P.N.

PHYSICAL ASSESSMENT

01:25 08/09/26. Ambulatory to room.

GENERAL / NEURO / PSYCH: Alert. Oriented X 4. Appears in pain.

HEENT: Pupils equal, round and reactive to light. Head non-tender.

RESPIRATORY: Respirations not labored. Chest nontender. Breath sounds within normal limits. (RT RIB PAIN).

CVS: Right rib area: tenderness and small abrasion. Cardiac rhythm: sinus tachycardia. Pulses within normal limits.

Capillary refill less than 2 seconds.

GI / GU: Abdomen soft and nontender.

EXTREMITIES: Extremities exhibit normal ROM. Neuro-vascular status intact to the extremity.

SKIN: Skin intact. Skin is warm and dry. -- 01:28 08/9/26 EDT Brian Moore, L.P.N.

NURSING PROGRESS NOTES

01:28 08/09/26. Two patient identifiers checked. Patient placed in chair. Brakes of chair on. Patient ready for evaluation- ED physician notified. -- 01:28 08/9/26 EDT Brian Moore, L.P.N.

01:45 08/09/26. Checked patient name, birthdate and medical record number: patient confirmed. Blood samples drawn from the left antecubital space by lab per protocol ; labeled in presence of the patient: rainbow set. -- 01:45 08/9/26 EDT Brian Moore, L.P.N.

02:00 08/09/26. Site #1 started by IV nurse in the left antecubital space with a 20g needle; 1 attempt. Saline lock flushed with 10 mL saline. -- 02:14 08/9/26 EDT Brian Moore, L.P.N.

02:05 08/09/26. Patient transported to CT by wheelchair with radiology tech. -- 02:15 08/9/26 EDT Brian Moore, L.P.N.

02:25 08/09/26. Patient walked back from CT with radiology tech. -- 02:37 08/9/26 EDT Brian Moore, L.P.N.

02:42 08/09/26. IV NS 1000 mL started in bag#1 1000 mL at 250 mL/hr via Site# 1. Allergies verified and confirmed 5 rights. Via IV pump. IV patency established. IV site checked: no pain, redness, or swelling. IV flushed thoroughly pre-medication administration. Information reviewed with patient. -- 02:43 08/9/26 EDT Brian Moore, L.P.N.

03:15 08/09/26. Reassessment after fluids administered. Overall patient status- the patient states feels better. --

03:21 08/9/26 EDT Brian Moore, L.P.N.

03:26 08/09/26. KetorOLAC IM 30 mg given. Given in the right gluteus maximus. Allergies verified and confirmed 5 rights. Information reviewed with patient. -- 03:27 08/9/26 EDT Brian Moore, L.P.N.

03:27 08/09/26. Cyclobenzaprine PO 10 mg given. Allergies verified and confirmed 5 rights. Information reviewed with patient. -- 03:27 08/9/26 EDT Brian Moore, L.P.N.

DISPOSITION / DISCHARGE

01:25 08/09/26.

SUPERVISORY NOTE: I reviewed the triage and assessment note(s). I agree with the documentation. -- 03:23 08/9/26 EDT Lacy Parker, R.N.

03:25 08/9/26. BP: 128/78 (large cuff) taken on left arm, by automated monitor, while lying. MAP: 95. HR: 86.

Regular, normal rate and strong. RR: 20. Regular and unlabored. Rate is normal. O2 saturation: 98% on room air.

Temperature: 98.6 F (oral). Pain level now 3/10. Glasgow Coma Scale: 15 - eyes open - spontaneous (4); best verbal response - oriented (5); best motor response - obeys commands (6). -- 03:34 08/9/26 EDT Brian Moore, L.P.N.

03:25 08/09/26. IV NS: Medication Discontinued. bag #1 discontinued upon discharge. Total amount infused: 250 mL. IV patency established. IV site checked: no pain, redness, or swelling. IV flushed thoroughly post-medication administration. -- 03:37 08/9/26 EDT Brian Moore, L.P.N.

03:25 08/09/26. Site #1 removed upon discharge. Pressure dressing applied. -- 03:37 08/9/26 EDT Brian Moore, L.P.N.

Departure time: 03:35 08/09/2026. Condition at departure: improved. No learning barriers present. Discharge instructions provided and reviewed with the patient. Patient verbalized understanding. Written instructions provided in English. The patient was discharged by the physician. The patient was discharged home and accompanied by spouse. The patient left ambulatory and via private vehicle. Spouse driving. -- 03:35 08/9/26 EDT Brian Moore, L.P.N.
