**Assessment**

Child is well appearing, and nontoxic. After careful history, physical exam, vital signs, and review of any laboratory or diagnostic data as ordered, I made the decision the patient does not appear to have a life threatening illness and can be carefully discharged with close follow-up. I do not feel any further imaging or laboratory data is needed at this time. I have considered both emergent, urgent disease pathology, and the current **DIFFERENTIAL DIAGNOSIS** including but not limited to:

Viral URI

Strep Pharyngitis

Meningitis/Encephalitis

Pneumonia

**Chronic conditions addressed impacting care:**

I have given written and verbal discharge instructions.

Patient advised of the importance of following up with their PCP concerning findings, treatment, and status post treatment. Extensive conversation with patient regarding findings, differential diagnosis, return precautions and treatment plan. Patient was educated on any prescriptions and proper usage as well as the importance of following up with primary care in a timely fashion for ongoing health and wellness management. The nursing staff has reiterated the disposition plan as well.
