Abnormal Results: Last 24 Hours: No Labs Available

Lab Results: Last 24 Hours: No Labs Available

Ordered Meds List

HYDROCOD/ ACET TAB [5-325 MG], X1

IBUPROFEN TAB [600 MG], X1

Radiology:

Preliminary radiology interpretation based on my review pending official read:

X-ray right hand four view -

There is a oblique fracture through the mid shaft of the right 5th metacarpal bone with slight displacement

Review of Diagnostics

I have personally reviewed and interpreted the results of the diagnostic findings as ordered, including the need for these tests based upon the history and physical exam performed to assure we rule out any emergent/urgent findings.

This also includes my independent review and analysis of any EKG or radiographic study as ordered, as timely preliminary interpretation is important to the care of the patient. Any pertinent findings will be addressed as needed, as well as relayed to the patient or appropriate party so they are aware.

Assessment

Patient presents to the ED with complicated right hand injury with suspicion for fracture. Also concern for neurovascular injury /tendon injury. The patient is well appearing, and nontoxic. After careful history, physical exam, vital signs, and review of any laboratory or diagnostic data as ordered, I made the decision the patient does not appear to have a life threatening illness and can be carefully discharged with close follow-up. I do not feel any further imaging or laboratory data is needed at this time. I have considered both emergent, urgent disease pathology, and the current DIFFERENTIAL DIAGNOSIS including but not limited to:

Those listed above

Chronic conditions addressed impacting care:

I have given written and verbal discharge instructions.

MADISON COUNTY MEMORIAL HOSP.
224 NW CRANE AVE, MADISON, FL 32340 - 850-973-2271

Patient Name: CHRISTOPHER SHREVE

DOB: 01/29/1985

MRN: 89546

Account #: 1073491

Note Type: ED Physician Note

Patient advised of the importance of following up with their PCP concerning findings, treatment, and status post treatment. Extensive conversation with patient regarding findings, differential diagnosis, return precautions and treatment plan. Patient was educated on any prescriptions and proper usage as well as the importance of following up with primary care in a timely fashion for ongoing health and wellness management. The nursing staff has reiterated the disposition plan as well.

Diagnosis Today

Problem: Displaced fracture of shaft of fifth metacarpal bone, right hand, initial encounter for closed fracture, **ICD Code:** S62.326A, **Status:** Active, **Addressed Date:** 07/15/2026

Plan

Schedule first available follow up appointment with the Tallahassee Orthopedic Clinic at www.teamtoc.com or present to their walk-in clinic at:

2605 Welaunee Blvd
Tallahassee, FL 32308

Wear splint as directed until follow-up with orthopedic clinic.

Take Tylenol over the counter as directed for pain

Apply ice pack to reduce swelling and pain

Return immediately for any unexpected change in your condition

Thank you for choosing our Emergency Department for your healthcare! Please take your medicines prescribed as directed and be assured that you follow up with the physician provided or your PCP in the next 1-2 days to assure you are improving. All medical problems cannot be reasonably diagnosed in your ED visit today. Return for any changes or concerns, including if your condition does not improve or you are unable to obtain follow-up. Some final results, including radiology and laboratory reports, do not return the same day, but are available on the patient portal or can be obtained through your PCP.

May return to work 7/16 with the following restrictions:

No lifting with the right hand until cleared by orthopedist.
