ED Course

Clinical Impressions as of 09/13/26 1515

Acute non-recurrent maxillary sinusitis

Medical Decision Making

: Differential ; strep throat, viral syndrome, sinusitis

Plan: 17-year-old male patient who presents to the emergency department with complaints of sore throat, congestion, headache for 2 days and it is worsening. He denies any fever but he does endorse painful throat. Patient reports no distress, no nausea, vomiting or or diarrhea. No abdominal pain or chest pain. He does endorse a cough but is not productive.

Vital signs stable

Rapid strep, viral panel ordered

Viral panel is negative for COVID RSV and influenza

Rapid strep is negative

Educated the patient on findings, treatment, and outpatient management. He verbalized understanding he's agreeable to plan.

Educated the patient to Rest

Increase fluids

Continue with antibiotic as prescribed- 1st dose given in the emergency department

Continue with potassium as prescribed - 1st dose given in the emergency department

Continue with symptomatic management such as:

- Tylenol and ibuprofen as needed for fever and pain

- cough medication as package instructs

- cough drops for sore throat and cough suppression

- Vicks Vaporub

- cool mist humidifier

- Mucinex as tolerated

Follow up with her primary care provider next 2-3 days for further evaluation and exam

Return to the emergency department with any worrisome sign or symptom

Answered all questions to his satisfaction he's agreeable to plan. He denies any further needs or concerns to be addressed prior to discharge

Amount and/or Complexity of Data Reviewed

Labs: ordered.

Risk

Prescription drug management.

	ICD-10-CM
1. Acute non-recurrent maxillary sinusitis	J01.00

Rest

Increase fluids

Continue with antibiotic as prescribed- 1st dose given in the emergency department

Continue with potassium as prescribed - 1st dose given in the emergency department

Continue with symptomatic management such as:

Final result**Narrative:**

Negative results should be treated as presumptive and, if inconsistent with clinical signs and symptoms or necessary for patient management, should be tested with different authorized or cleared molecular tests.

Testing was performed using PCR methodology. This assay has been authorized by the Food and Drug Administration under an Emergency Use authorization (EUA) for use, without modification, by CLIA high complexity laboratories. Testing of specimens collected from individuals is based on clinical criteria
